

ZAIDYN Data Hub R13.1 Release Preview

Staging: August 29, 2025

This release introduces key features that streamline business data validations and enable flexible, cost-efficient scaling through serverless infrastructure support.

Objective

Streamline business workflows and **reduce time-to-market** by implementing domain-based Business Checks for **reliable and reusable data validations**.

Optimize resource usage through **serverless EMR architecture**.

Impact

Introduces a reusable **Business Checks validation layer** using standardized, configurable templates. Results surface actionable insights, improving accuracy, issue detection, and adherence to data quality standards.

Enables **cost savings, operational efficiency, and quicker workflow execution**.
