

# ZAIDYN Field Deployment R7 Release Preview

Staging: January 25, 2025 | Production: February 15, 2025

*This release includes several features and enhancements that bring domain intelligence & innovation, support users globally, improve usability & self-service capability and increase operational efficiency across various processes.*

## Objective

Identify and Optimize territory coverage by enforcing **Contiguity checks & reports.**

Select **alignment entities through pre-defined shapes** (such as City, State, ZIP code, etc.) associated with geographical layers to **visualize the geographical spread.**

**Define attributes and metrics** at the position grain.

Allow **Roster Admins** to define validations and manage **Employee metrics via UI.**

## Impact

Improved territory coverage to provide **more face-time with customers**, faster alignment decision for alignment users while maintaining contiguity.

**Improved visualization & selection** of entities due to newer capabilities added to existing lasso selection.

Seamless **information flow** of position attributes to **downstream systems.**

**Self-serve changes** in under a **minute**, improving ops efficiency, data integrity checks, with **faster response** to evolving staffing and compliance needs.

# ZAIDYN Field Deployment R7 Release Preview

Staging: January 25, 2025 | Production: February 15, 2025

*This release includes several features and enhancements that bring domain intelligence & innovation, support users globally, improve usability & self-service capability and increase operational efficiency across various processes.*

## Objective

**Auto-removal** of dependent entities while removing **Positions and Product Assignments** via UI.

**Role category** management via UI to allow ad-hoc **changes** without **file uploads**.

## Impact

**Reduces complexity** of managing multiple files for **Product & assignment** removal, improving ops efficiency by up to **50%**.

**Streamline updates**, improve **operational efficiency** of ad-hoc role category management by up to **70%**.
